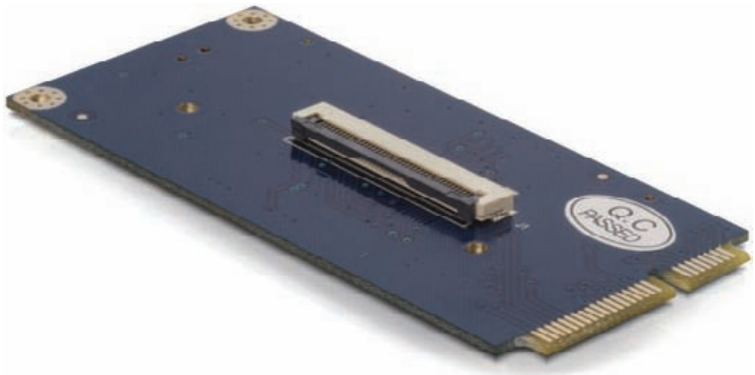
Mini PCI Express (IDE) > 1 x ZIF



Description

This converter by Delock enables you to equip your Netbook with a ZIF drive, in case the miniPCIe port is an IDE interface, e.g. in the eeePC901. The ZIF drive will act as slave data memory. If you have a Netbook with a miniPCIe IDE master SSD in full format , you can use the converter with ZIF drive as bootable drive.

Ref.	91476
EAN	4043619914760
Country of origin	China
Customs tariff number	84718000
